

BUILDING YOUR PERSONAL BRAND

WHY LINKEDIN?

CONSIDER LINKEDIN YOUR **DIGITAL RESUME**

As you network and apply for jobs, it's virtually *guaranteed* that recruiters will look you up on LinkedIn; **make sure your profile makes a great first impression!**

Recruiters will ask themselves:

- ✓ Does this look like the profile of a Data Analyst?
- ✓ Does this seem like someone we'd enjoy working with?
- ✓ Do they come across as polished and professional?
- ✓ Is it clear that this person's experience and skills are relevant to the role?
- ✓ Do we share any mutual connections who might serve as a reference?
- ✓ What type of content does this person share? How do they interact with others?

LINKEDIN PROFILE ELEMENTS

1

Profile Photo

- Your profile photo should be clear and well-framed, and signal that you are professional and approachable

2

Background Image

- Use this space to sell yourself, grab the viewer's attention, and show your passion and creativity

3

Headline & Intro

- Your headline should make it clear that you are all about analytics, and can be a great place to list top skills or tools

4

About Section

- Use this space to share your personal story and describe some of your top skills or major accomplishments

5

Experience Section

- Showcase your relevant experience, and remember to use clear, descriptive, and outcome-focused language

6

Education, Licenses & Certifications

- Feature any relevant academic records, licenses or professional certifications you've earned

Background Image

- Use this space to sell yourself, grab the viewer's attention, and show your passion and creativity

Tips for background images:

- ✓ Make sure it's relevant to the audience
- ✓ Use a high res image, with proper dimensions
- ✓ Showcase relevant awards or accomplishments
- ✓ Be creative! You can include meaningful quotes, project screenshots, custom branding, etc.

PRO TIP: The background image is valuable real estate and often the first thing people will see; **don't waste space with a generic stock photo!**

HEADLINE & INTRO

The banner features a circular profile picture of John Smith on the left. To the right is a collection of skill badges: PIVOT TABLES, POWER QUERY & DAX, POWER BI DESKTOP, POWER BI SERVICE, ADVANCED DAX, ADVANCED MySQL, TABLEAU DESKTOP, TABLEAU PREP, ADVANCED TABLEAU, MySQL ANALYSIS, and DATABASE ADMIN. On the far right is a large shield badge that reads 'BUSINESS INTELLIGENCE ANALYST'.

Headline & Intro

- Your headline should make it clear that you are all about analytics, and can be a great place to list top skills or tools

Tips for Headlines & Intros:

- ✓ Use a data or analytics-focused headline, even if it isn't your formal title or professional role
- ✓ Include top skills or tools, or describe what you do ("I help businesses make smart, data-driven decisions")
- ✓ Include your current position and education, if they are relevant to the audience
- ✓ Add your geographic location and basic contact info

Want to customize your intro section?

About

Experienced analyst, data visualization specialist, and strategic problem solver. I'm passionate about transforming raw data into clear and actionable insights that deliver real-world business value. My background as a Supply Chain Specialist in the US Army has given me a deep foundation in data collection, analysis, visualization, and business intelligence.

I am a resourceful, inquisitive, and driven problem-solver, specializing in using tools like Excel, MySQL, Power BI and Python to help businesses unlock the power of their data. I value integrity and honesty, and believe in the importance of leading by example.

If you haven't already, please send me a connection request – I'd love to connect with like-minded people who share my passion for bringing data to life.

If you'd prefer to connect directly, I can be reached at jsmith@email.com

4 About Section

- Use this space to share your personal story and describe some of your top skills or major accomplishments

Tips for the About Section:

- ✓ Tell a compelling story that clearly describes who you are and what you do
- ✓ Be descriptive, but concise (3-4 short paragraphs)
- ✓ Use relevant and appropriate keywords (i.e. *data, analytics, business intelligence, SQL, Excel, etc.*)
- ✓ Let your personality show, but keep it polished and professional (*avoid slang or poor grammar*)
- ✓ Include a call to action or personal email (*optional*)

PRO TIP: Don't bluff. What you write should be an accurate reflection of who you are in reality

THE EXPERIENCE SECTION

John Smith
Data Analyst & Visualization Expert (SQL | Power BI | Python)
Greater Boston - [Contact Info](#)

Maven Analytics
Barnett College

Skills: PIVOT TABLES, POWER QUERY & DAX, POWER BI DESKTOP, POWER BI SERVICE, ADVANCED DAX, ADVANCED MySQL, TABLEAU DESKTOP, TABLEAU PREP, ADVANCED TABLEAU, MySQL ANALYSIS, DATABASE ADMIN, BUSINESS INTELLIGENCE ANALYST

5

Experience Section

- Showcase your relevant experience, and remember to use clear, descriptive, and outcome-focused language

Tips for the Experience Section:

- ✓ Write job descriptions that clearly showcase your relevant skills and quantify the impact you've made
- ✓ Focus on your most recent and relevant roles
- ✓ Use clear and descriptive job titles
- ✓ Link jobs to company pages on LinkedIn

Experience

Student, Business Intelligence Path

Maven Analytics

- Analyzed data using Excel, SQL, Power BI and Tableau to identify QA issues, expose meaningful patterns and trends, and deliver actionable insights to optimize performance
- Developed dynamic, interactive reports and dashboards using Power BI and Tableau to explore customer-level transactions and purchase patterns

Supply Chain Specialist

United States Army

- Managed all aspects of unit-level supply chain, including inventory analysis, shipping and receiving operations, staffing, and warehouse logistics
- Used SQL and Excel to manage database records, create data-driven alerts, and develop reports to track supply chain KPIs, which helped reduce inventory turnover by 20%

PRO TIP: You can add media to this section (*links, videos, etc.*), but we recommend **featuring posts** as a better way to showcase content (*more on that soon!*)

EDUCATION, LICENSES & CERTIFICATIONS

6

Education, Licenses & Certifications

- Feature any relevant academic records, licenses or professional certifications you've earned

Tips for Education, Licenses & Certs:

- ✓ Include the school name, degree, field of study, enrollment dates, and honors/GPA (*optional*)
- ✓ List any relevant activities & societies
- ✓ Use the Description field to showcase your major honors or accomplishments
- ✓ Add licenses & certifications you've earned through courses, bootcamps or exams to validate your skills

PRO TIP: Less is more; resist the urge to stuff your profile with “filler”, and focus on what matters most

Education

Awesome University

B.A, Economics – Summa Cum Laude
2004 – 2008

Activities and societies: Phi Beta Kappa, Sports Analysis Club (Co-Founder), Economics & Calculus Teaching Assistant (TA)

- Co-Founded the university's first sports analytics club, focused on using statistical methods to explore innovative research projects in the sports industry
- Used SQL, Excel, Python and R to extract and analyze raw public data, and presented work to the annual Sports Analytics conference in Boston, MA
- Awarded the Charles Bludhorn Prize in Economics for outstanding academic achievement

PRO TIP: ADDING MAVEN BADGES

SHARE BADGES TO **VALIDATE YOUR SKILLS**

Course and path credentials from Maven Analytics are a great way to **showcase your accomplishments, validate your skills,** and **catch the attention of recruiters**

Maven Analytics

Accredible

LinkedIn

PRO TIP: RECORDING A COVER STORY

BRING YOUR PROFILE **TO LIFE**

Instead of a static profile photo, you can **record a mobile cover story** to introduce yourself

PRO TIP: FEATURING CONTENT

PUT YOUR **BEST WORK FORWARD**

LinkedIn's **Featured** section allows you to showcase specific posts at the top of your profile; this is a great way to **share projects** and **promote your best content**

-  Add a post
-  Add a newsletter
-  Add an article
-  Add a link
-  Add media

Don't have any projects to share?

Join one of our **monthly challenges**, or head to the **Data Playground** and check out our free datasets!

KEY TAKEAWAYS

Think of your LinkedIn profile as a **public, digital resume**

- *Your profile is often be the first impression recruiters will see, so make sure it's a positive one!*

Keep it professional, but let your **personal brand** shine through

- *LinkedIn is a great place to share your passion, showcase your creativity, and tell your unique story*

Share **course badges and credentials** to validate your skills

- *Add relevant badges you've earned to the "licenses & certifications" section of your profile*

Use **featured posts** to showcase your best projects

- *This is one of the easiest ways to build a project portfolio and show recruiters what you can do*
